INSPIRED!

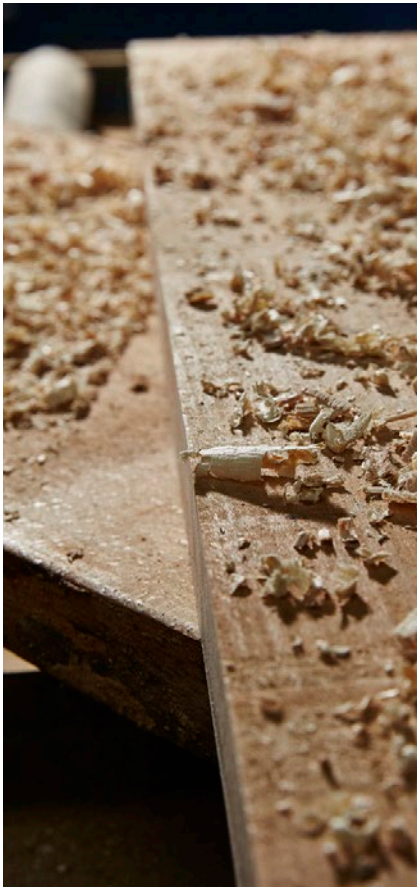

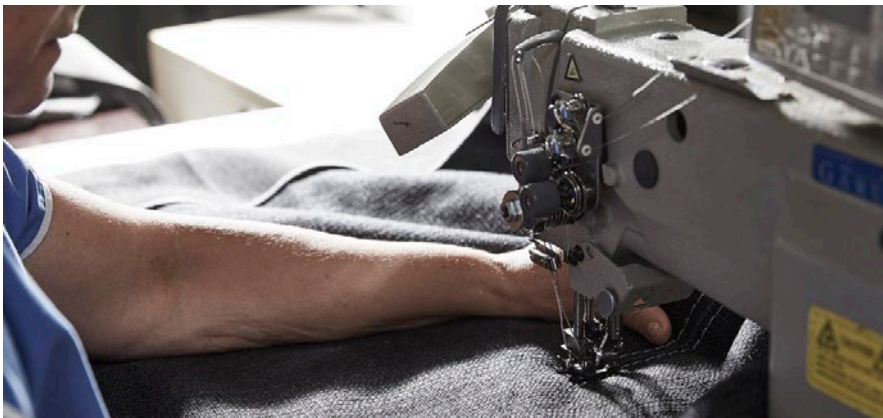

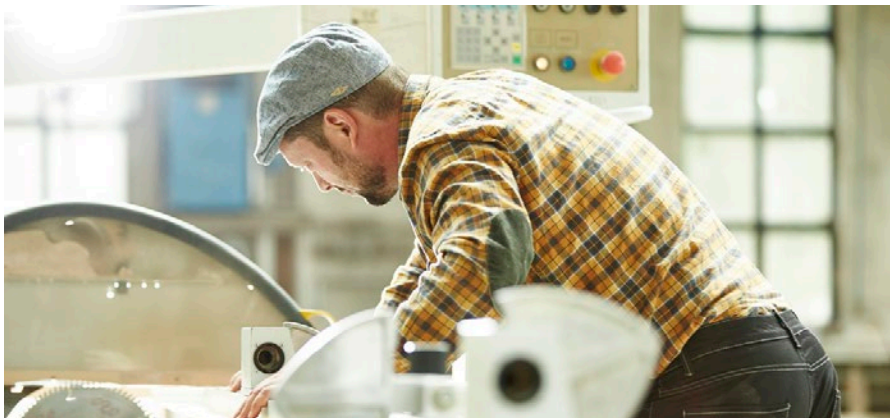

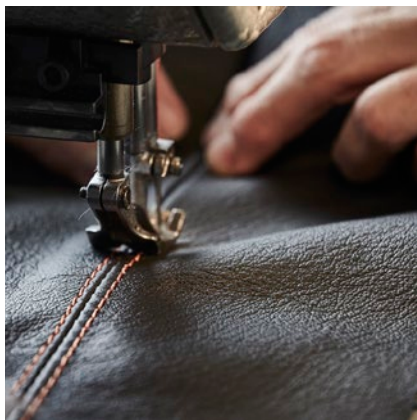

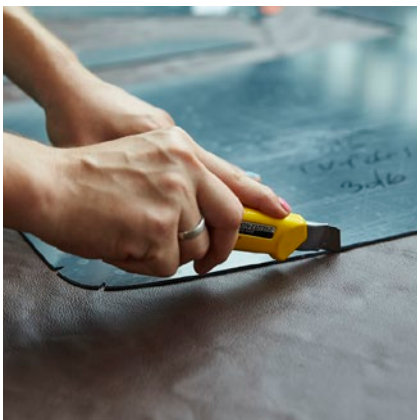

Zsolt Karajz art director / lead designer

Robert Milics sales engineer

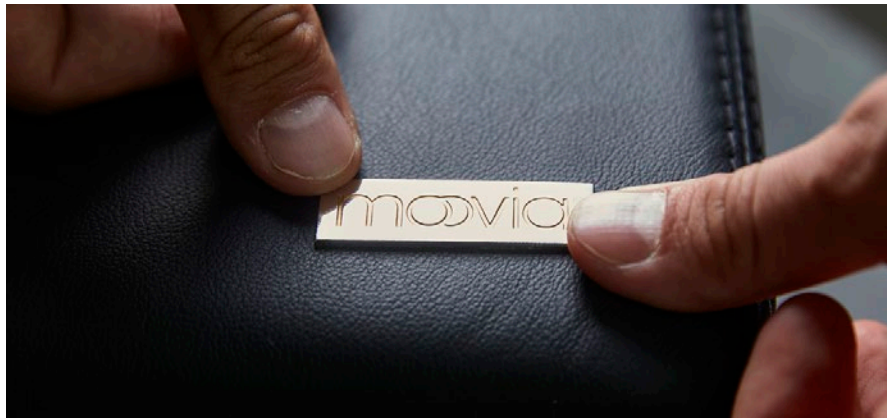

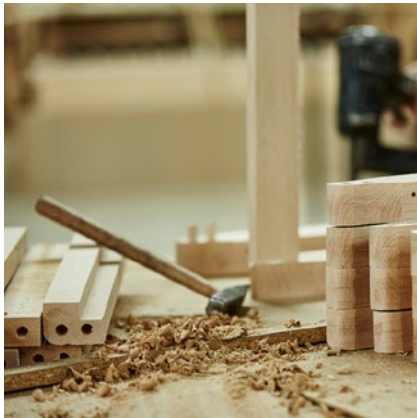

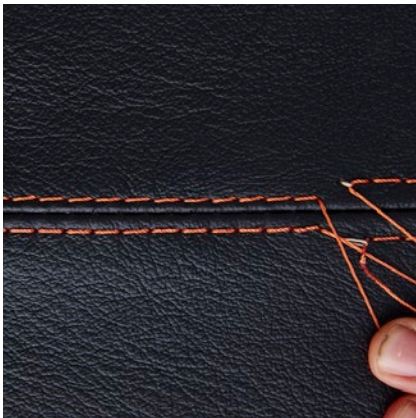

Renowned product designers support us in the development of new models. They do not only endeavor to make our chairs comfortable and to give them an exclusive appearance, they also create a small piece of art for your personal home. The large variety of leather, cloth, and wood options you can choose from allows you to design your own personal chair.

A young generation of European designers, the adherence to strict German quality and manufacturing standards, and the fact that our chairs are 100% hand-crafted ensure that our products are unique. After all, nothing can replace the expertise of meticulous and experienced master craftsmen

TRAPEZOIDAL ARMREST

Ask for chairs with trapezoidal center armrests if you would like to arrange two or more seats in a semicircle.

BREIT

BERLIN

from Berlin with love

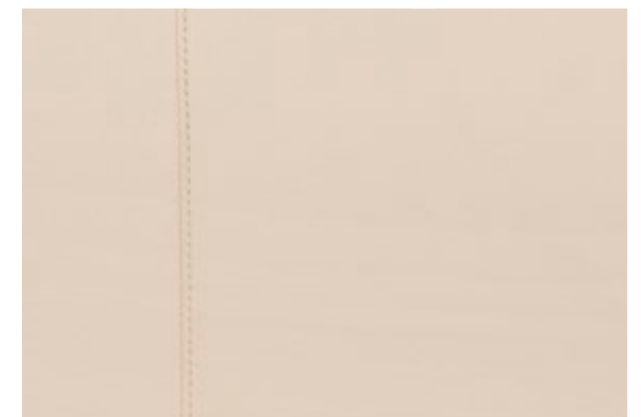

14/15

STRAIGHT ARMREST

Ask for chairs with straight armrests if you like to arrange two or more seats in a straight line.

with a touch from the Scandinavian woods

16/17

STORAGE COMPARTMENT

Optionally, you can also have your chairs equipped with a storage compartment in the side or center armrest, hidden under the arm support of the armrest. This compartment can even be matched to the exterior design of your chair, either made of corresponding solid wood or lined with leather.

2 BUTTONS

The standard version of our home cinema chair features the combined control of the footrest and backrest with a single motor drive system. The front bottom first opens the footrest and then adjusts the angle of the backrest. The rear button first closes the footrest and then tilts the backrest forward.

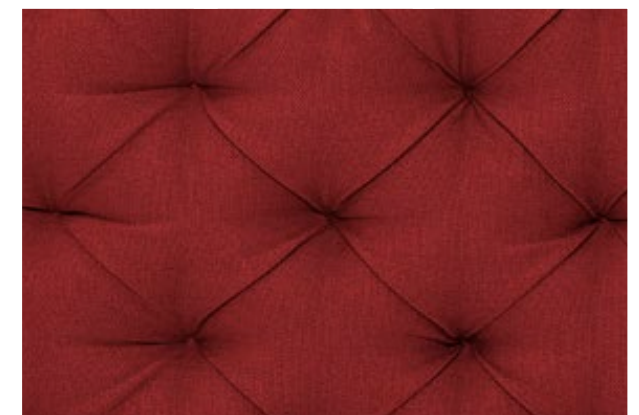

CHESTERFIELD

4 BUTTONS

If you wish to control the footrest and the backrest separately, our home theater chairs can be equipped with a two motor drive system. The buttons in the front allow the opening and the closing of the footrest and the buttons behind control the angle of the backrest.

CUP HOLDER

We cannot imagine watching an exciting sports broadcast or a romantic love story without the right drink! Thanks to the cup holders that are integrated in our armrests, your favorite drink will always be within your reach.

kvadrat

All are the products of innovative collaborations between leading international designers, artists and architects, and our product development team.

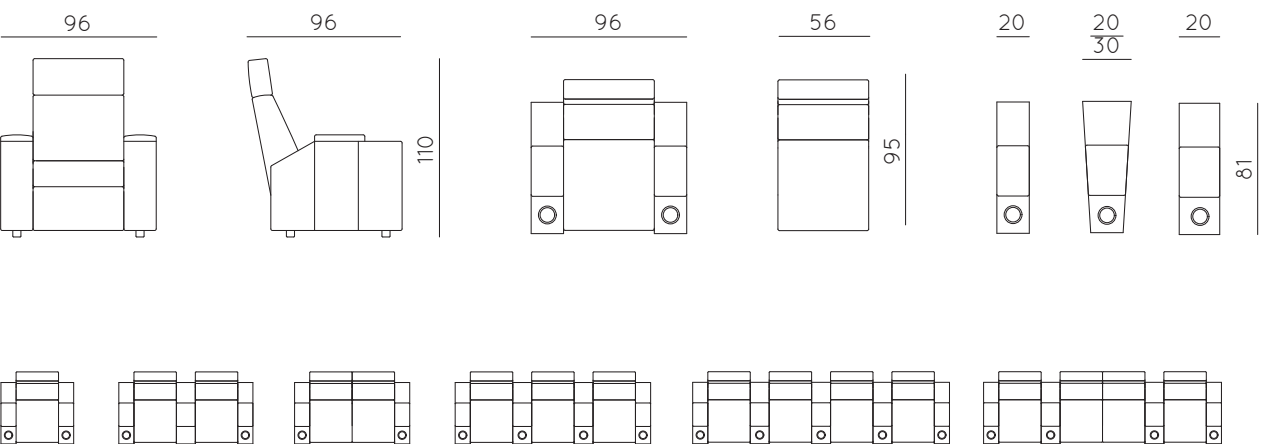

SPECIFICATION AND COLORS

You can choose between individual seats or any arrangement of seats with or without a loveseat (a double chair without a center armrest) as well as between straight or trapezoidal center armrests. Optional features include cup holders, additional storage compartments in the center or side armrests and a seat control system with either one, two or three motors to adjust the setting of the footrest and backrest (combined or separately).

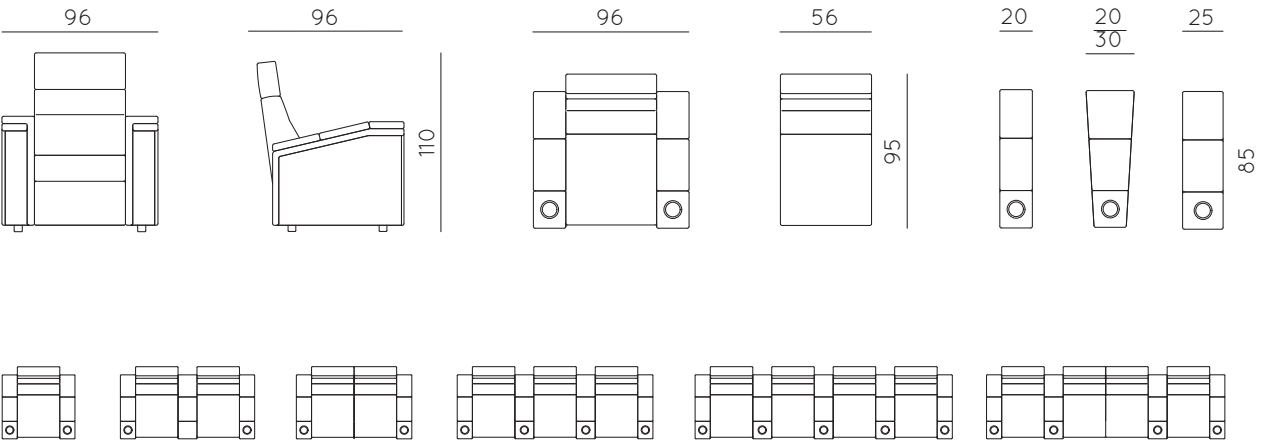

VENICE - a gentle piece of baroque

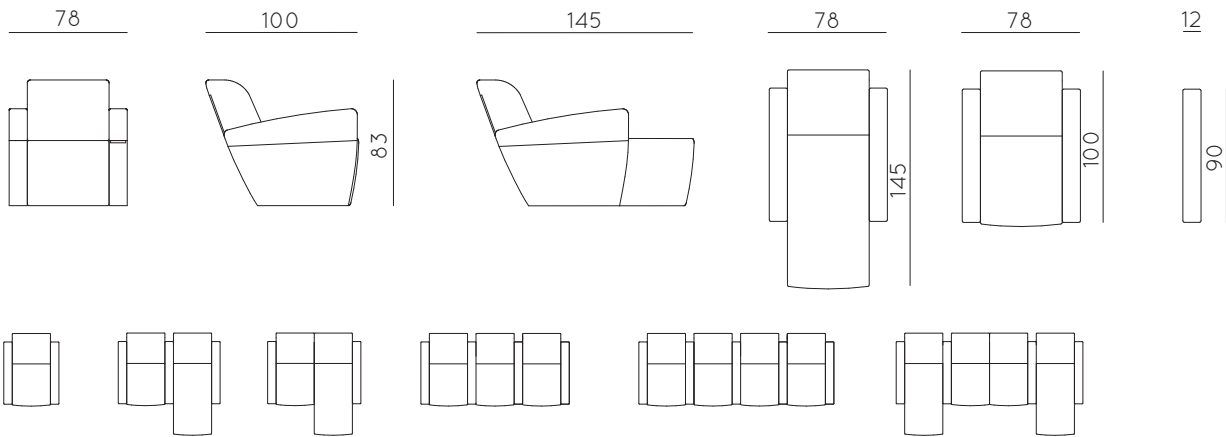

BERLIN - from Berlin with love

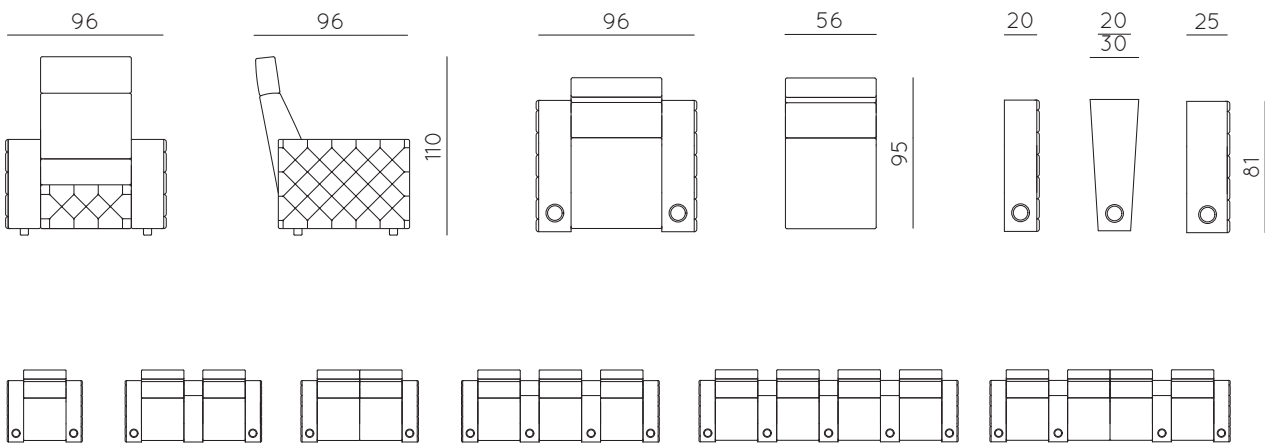

STOCKHOLM - with a touch from the Scandinavian woods

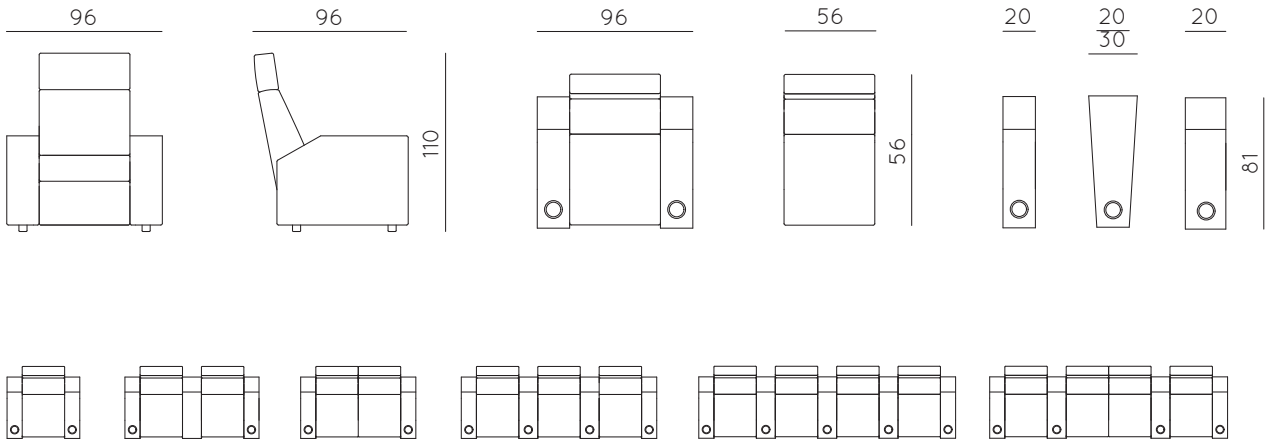

MONACO - just lounge around MONACO

CHESTERFIELD - meet the traditionalist

RIO - layover do Brasil

CONTROL

Every extra service can be easily controlled with our own developed application, which is available for android and ios systems, too. These extra services can be perfectly integrated to any KNX compatible home automatization system.
